

Here's the clamshell system currently in place:

- Grab a clamshell at a take out facility
- Fill your clamshell with your meal
- Take your meal to your room
- Eat your meal
- Deposit the clamshell in the recycle room in your residence hall, containers in Angell College Center or at any dining facility
- Clamshells are then sanitized and used again and again and again

But here's the problem...the clamshells are not being returned. Literally thousands are missing in action and most likely have ended up in the trash defeating the purpose of the clamshells altogether.

We want your help - offer us a solution - whether it's a system of student accountability, locations of clamshell returns, etc. - you come up with an idea and we'll listen!
